

imageframe.cpp

```
graph TD; A[imageframe.cpp] --> B[imageframe.h]; A --> C[QResizeEvent]; B --> D[QFrame]; B --> E[QSize];
```

The diagram illustrates the dependencies of the imageframe.cpp file. It is a hierarchical structure where imageframe.cpp is the root, depending on imageframe.h and QResizeEvent. imageframe.h, in turn, depends on QFrame and QSize.

imageframe.h

QResizeEvent

QFrame

QSize
